

## FREE ENERGY EFFICIENCY RESOURCES

Visit these websites to find helpful tools and references that can help you operate and maintain your facility in the most energy efficient manner.

Operations + Maintenance Best Practices – A Guide to Achieving Operational Efficiency

[www1.eere.energy.gov/femp/pdfs/omguide\\_complete.pdf](http://www1.eere.energy.gov/femp/pdfs/omguide_complete.pdf)

**Strongly recommended for building managers!**

COMcheck Software – **Dept. of Energy’s Building Code**

[www.energycodes.gov/comcheck/ez\\_download.stm](http://www.energycodes.gov/comcheck/ez_download.stm)

Download code compliance software, can be used to evaluate “what if” scenarios

**Energy Star’s Portfolio Manager Tool**

[www.energystar.gov/index.cfm?](http://www.energystar.gov/index.cfm?)

[c=evaluate\\_performance.bus\\_portfoliomanager](http://www.energystar.gov/index.cfm?c=evaluate_performance.bus_portfoliomanager)

User friendly tool to benchmark and baseline facility energy use

MotorMaster (Dept. of Energy)

[www.eere.energy.gov/industry/bestpractices/software\\_motormaster.html](http://www.eere.energy.gov/industry/bestpractices/software_motormaster.html)

Tool that supports motor and motor systems planning to maximize efficiencies

Alliant Energy

[www.alliantenergy.com/UtilityServices/ForYourBusiness/EnergyExpertise/EnergyEfficiency/index.htm](http://www.alliantenergy.com/UtilityServices/ForYourBusiness/EnergyExpertise/EnergyEfficiency/index.htm)

Info on efficiency technologies for HVACs, variable speed drives, compressed air systems
